

The

Paradise
Collection

Welcome

Welcome to the paradise collection of GRP composite entrance doors. Each door is carefully crafted at our specialist factory using the very latest state of the art manufacturing technology. A paradise composite door carries a number of superior practical benefits

- Each door has a durable GRP outer skin that is virtually maintenance free. No painting or ongoing upkeep is required but rather merely the occasional wipe with a damp cloth.
- Multi point locking is fitted as standard offering very high levels of security.
- Doors are available in a number of solid colours and wood grain finishes. New modern colour shades such as Chartwell Green, Duck Egg Blue and Grey are now also available.
- High specification materials ensure each door is perfectly watertight providing a solid barrier from the elements.
- A range of traditional and modern hardware finishes provide a perfect finish to each door set. A selection of specification options is available to view on pages 18-19 of this brochure.
- All our glass designs with the exception of Orchis and Vario are triple glazed.

BRAND NEW DECORATIVE GLASS FINISHES

Backing Glass

Flush Finish To Bevel

Striking Color

Glue Chip Effect

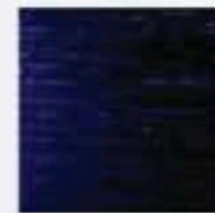

Our brand new decorative glass options feature enamel colours with simulated lead lines fused onto the glass combined with sandblasted, glue chip and clear bevels. The clear bevels sit proud to the simulated lead lines which are flat to the glass. All glass designs come with an obscure pattern of backing glass giving you a high level of privacy (backing glass as shown above)

Where colour options are available in the glass please state which colour is required. (if colour is not stated when ordering then where possible the colour will automatically be selected to match the door)

STANDARD FINISH

Hardware is available in a number of finishes to suit both your home and personal tastes. These include Chrome, Gold, Black, Satin and White. Lever / lever and lever / pad door handles are available. The lever / pad option means the door can be closed without having to worry about key locking from the inside.

HARDWARE

Knockers available with or without spyholes

CONTEMPORARY FINISH

Modern Curve Stainless Steel Handle

1200mm Stainless Steel T-Bar Handle

1200mm Stainless Steel Cranked T-Bar Handle

KNOBS

When selecting the T bar, modern or door knob option as a handle for your door we use a key operated door lock which can only be operated with the key.

Security Upgrade

ANTI BUMP CYLINDER

These special cylinders are designed to counter the threat of a burglar breaking the key cylinder to gain access to a property. They are anti-pick, anti-drill, anti-bump and anti-snap. This upgrade offers far greater levels of security and great peace of mind.

All the bevels in this brochure are glass cut bevels and small inclusions may be found in some bevels and these should not be regarded as a fault. All bevels are cut and bonded to glass by hand meaning some variation in shape may occur. Due to limitations in the print process, door and glass colour shades may vary from those shown and are for guidance purposes only.

Unique door panels ltd's policy is one of continuous improvement and the right is reserved to change design and specification without notice. The unauthorised copying or reproduction of any designs in this brochure will result in legal action being taken under the designs and patents act 1988.
